Proceed with caution, changes delivery time after payment, will update once I receive my order.

update: still no server after 9 hours after being promised delivery in 1 hour

another update: absolute retard do not deal with him, I ask him before purchase if he allows scanning. He says yes, sells me the server. Delivers the server after a bunch of delays. Comes out to tell me not to use it for scanning because it's not allowed.

Only buy from him if you feel like being spam called at 5 am because you would close the dispute against him.

Because you were using it for mass scanning. Scanning your private subnet or servers or subnet you own is good but receiving blocks to our IPs is bad because you are either port scanning servers to backdoor or scanning without their consent

First of all I said scanning is allowed but with no black hat activities, you said yourself I will just do normal scanning, nothing blackhat and then when using the server you start scanning random or targeted ports, again I warned you that you should not scan without IP spoofing and I said if you need IP spoofing there is another service you can upgrade to but you threaten to use our Raw IP address and scan and get us busted. Good for you if any host after hearing that will still allow running of your server? The biggest mistake you did was by threaten us, also black hat activities are not allowed, you can scan your personal servers, or rented IP colocations and subnets but not public IP list or subnets without the providers consent. It gets us blocked by their ISP and listed on IP blacklists.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
