1. Firstly, we're going to use <https://www.bitcoinlibre.io>

Download their Android App

2. Download their wallet on your phone and use their promo code when they ask for the invite/referral code:

librefree

or any other invite code you find on the internet.

3. Spin their wheel every day and grab your BTC. You win from 5 to 5000 Satoshi. You get them instant and there's no minimum amount to withdraw I guess.

Chill, it's not rigged. You won't win just 5 satoshis every time, received at least 1 from each prize so far.

You can also share your invitation code to get 50% of your friends' earnings to scale your earnings.

4. You'll need a wallet that accepts Lightning Network transfers to withdraw. The cool thing about this is that there won't be any fee and the transfer will be instant.

A nice and free one is [bluewallet.io](#)

That was it, nice and easy.

The last payment I got from them:
