Thread: [BOTANY BUCKS! - Make MONEY With Plants - Only \\$10 and make HUNDREDS EASY 24/7](#)

Koyote - August 5, 2022, 3:21 am

Hey everybody! Back again with another method that I personally use and can vouch for as it makes me some nice side money whenever I do it. It's incredibly simple and easy, requires no specialist knowledge, tools, or even investment depending on where you are and what you have available.

This cannot be saturated due to the nature of plants and the needs of people, and it's a nice and easy gig that will be satisfying and pleasant to work on! Get started today and you can be on your way to making a business you can be proud of.

Fully legal, fully safe and fully rewarding!

Vouch copies were available for Ub3rs and above, please don't beg for them, especially now they're gone.

If i could get some more info on this that'd be great!

Royal ! - August 5, 2022, 5:57 am

Now this is something Unique Idea I've seen for sale after quite some time. GLWS.

riekal - August 5, 2022, 4:56 pm

You know what man...I like it. I'll grab a copy to support ya. I like seeing this type of thing; outside of the normal ewhore greyhat botting stuff.

Upgrader - August 5, 2022, 4:59 pm

Interesting idea, does profit change depending on where you're located?

Amado - August 5, 2022, 6:31 pm

Something new, I like it. GLWS

[Koyote](#) provided me with a VC.

Method is short, sweet and simple. He provides the steps in a direct approach and if this niche is in your interest, I can definitely see it being profitable. This method falls in the unique category but probably more realistic then half the shit eBooks sold here. I don't believe it would become saturated

as it's quite a broad topic that is continuously being explored.

Hey much appreciated, will message you :)

Not necessarily, but if you were in a very dry area it may change some elements of how you did it. However with that being said, you should be okay regardless as the method would adapt to that.

Thank you for the review, I really appreciate it, and thanks for the kind words! I agree that I don't think it can become saturated due to the nature of it, so glad you think so too.

can you do this inside?

and how long does the plants take to grow?

Kaoru Hanayama - August 6, 2022, 9:14 am

There is money to be made. My grandmother is 70 years old and she grows plants and sell them online every year making \$20k + doing her hobby. There is bread to be made from this definitely. Great job OP :)

FilmGuy - August 6, 2022, 1:50 pm

Interesting, I'd take a vouch copy and supply a full review if you're interested.

Inside is ideal! And it's usually a couple of days at most to see results with this.

Okay cool, Are these basically like microgreens? I remember hearing about them before but never looked into it

yandi95 - August 7, 2022, 10:53 am

How much can i make in a month with this method?

SIM-4716193 - August 7, 2022, 8:46 pm

This looks out of the league, will definitely buy it.

Just tell me - any investment requirements, use of social media etc.

Just had a quick Google as I hadn't heard of these in that term before, and while it's not that specifically you could definitely do something similar there and make some serious cash long term!

(Aug 7, 2022 10:53 AM)yandi95 Wrote: [\[CITE\]](#) How much can i make in a month with this method? It really depends on how active you are with the process, but I can say from my experience it's an extra couple hundred a month easily once you've got started.

Depending on what you have available to you, you could honestly start with zero investment, but if not it's literally just pocket change to get started. You would benefit from social media to post some sales posts on a marketplace etc, but not necessary either :)

Bytes can be used as payment for this method now.

GaelicRabbi - December 2, 2022, 9:23 am

This looks interesting. Quick question, do you need a lot of space to get started with this? I assume more room = more profit, right?

It can definitely help, but you honestly don't need that much to get started. A windowsill or area near a window would be fine, and then more space to scale up can help, but with the method in its simplest form you can just churn out the goods over and over with minimal space needed.
