Uber Eats Vouchers!

Eat for 65% off!

How it works:

- Contact me (Discord in my signature is quickest)
- Make a contract for 65% off your Uber Eats or ride order total and pay me
- I send you a voucher link that adds to your Uber Eats account
- Your cart changes to free, and you can place the order for \$0 (including tip and fees even!)

You can buy bulk vouchers from me for cheaper. There is no order limit, and it works on any store/restaurant.

This can also be a money glitch if you or someone you know is a driver. Place an order with a \$100 tip to your driver, go pick it up yourself, and boom you got paid to eat food.

Thanks boss, you need to make a contract to vouch though! User bought off-site.

This is still working? Seems like all the voucher methods has been patched.
