Thread: [Classic Games that have never died](#)

Can you think of any games which you would say are classics and have never died. Also, some of which you might still play. Here is some from me:

Mortal Combat - This is probably the oldest classic that is still enjoyed today.

Grand Theft Auto (GTA)

Call of Duty (COD) - I believe the latest though is called Warzone?

Counter Strike Go (CS:GO)

Fortnite

Minecraft

The last two in the above list might be debatable. The following are what I believe are still classics but not really pop or heard much about these days. Do correct me if you think I am wrong though.

Super Mario

Sonic

Donkey Kong

Tomb Raider

Resident Evil

World of Warcraft (WOW)

League of Legends (LOL)

Clash of Clans (COC)

Roblox

Ok, now add yours and feel free to say if you think I should rearrange anything.

This is what I was going to say. Still have a massive following

Runescape is also still going strong with a solid player base!

The OG GuildWars, though it's certainly not as popular as it once was, it's not dead by any means.

The only ones that are debatable are:

Call of Duty

CS:GO

League of Legends (LOL)

These cannot even be on a list for classics:

Fortnite

Minecraft

Clash of Clans

Roblox

I'm still played both Call of Duty (COD) and World of Warcraft (WOW).

I'd be surprised if anybody here knew of it, but I used to play an old java based game called puzzle pirates back in like 2007. Think its barely alive but still kicking from what I understand.
