Do you listen to podcasts? If so on what subjects, and what are they called?

Fresku - August 7, 2022, 5:56 am

Do you have any good podcasts to share yourself?

I dont listen to that many English spoken podcasts, most of them are in Dutch, the only English one I sometimes check is X22Report for some US politics stuff.

I can't seem to code while listening to podcasts, usually something would come up in the podcast and i'd be focused to listen ;(

Most podcasts are uninteresting garbage. Just people talking to their friends trying to milk the fuck outta this niche like everything else. Majority of the people are non interesting.

I would recommend checking Sammy The Bull Gravano podcast dude was the underboss of the Gambino crime family under john gotti and helped planned killing paul Castellano. Guy really puts you right in there, great story teller.

Rad. I wish I could speak Dutch.

I listen to stacks of NFL podcasts, cause I'm into that.

Other than that, Freakonomics is good. And .Net Rocks. Side Hustle School. Indie Hackers. Income Prodigy.

Well yes that's probably true. That doesn't mean there's no good ones at all though.
