Hi, I have some questions, Can I run android emulators on them? Is it shared or Admin user only?
also can it be with a different OS?

I understand it's windows but can it be Windows server editions or only win 10?
Can we run Android Emulators on them? is each one is one user OR Shared service with many
accounts on each dedi?

Yeh you can run emulators. Do you want a free review account to try it out. If so make a vouch
contract with me ?

Servers are looking very good! I have tested it and the results are amazing. Everything that is promised in the thread is well delivered! Would honestly recommend this to anyone, for this price it's a absolute steal.

Showed pictures of his servers to proof he can deliver many of these.

Good luck with sales OP! :)
