I can vouch for this user.

He helped me with setting up a server I needed and configuring it.
Did fast work and was very easy to communicate with :)

Vouch for this guy. He helped me out in a time of need, and he really knows his stuff. What I thought was the optimal solution, he taught me that it definitely wasn't. When he says 'Beginner Friendly', he means it. I've asked tons of stupid questions, but he always answers fast, efficiently and friendly.

Definitely worth the price.

"Help with crypting", does that mean you will help choose which cryptor to use, or is it like teaching encryption?

What are the additional costs for exploits.

And it would be nice to see your offer in packages so we know what we are getting for what money.
