Thread: [Features lost with warning level?](#)

**Laughing Man** - August 9, 2022, 4:18 pm

I received a warning which according to my interpretation of HF documentation isn't correct but I'm not going to argue with staff it was a decision made and I just need to STFU and accept it, regardless of how incorrect the actions I think were.

However, Now since 24 hours have past and I can post again. I'm not able to use HF Convo or see my notifications which HF is telling me I have 3.

Is there a list of features you lose access to and at what warning level you lose them at? It's the one thing I can't seem to find.

so these services have been restored to your account, you just have really shit timing lmao  
Okay, i just wanted to make sure I wasn't missing something.

Thanks for letting me know.

If you are still experiencing issues with notifications and convo, try restarting your browser.  
All good thanks James.
