Thread: [BBitRat and Ddos perfect settings](#)

blablub - August 10, 2022, 3:30 am

what are the perfect settings for a port 80 http website?

Milk - August 10, 2022, 10:40 am

Ur not gonna have anywhere close to enough power to take down a website. Also I would highly not recommend to use bitrat in the first place since the owner is banned off basically all forums for ratting all the users

also discussion of ddossing or products that that ddoss arnt even allowed on this forum, might wanna remove ur thread before they limit ur shit for a week

you can discuss and ask about ddos all you want but offering services like ddos attacks is not allowed on HF unless the rules have changed in the last few months
