Thread: [Finding small businesses that need cell phone plans for their employees?](#)

hfaccount - August 14, 2022, 12:31 pm

I'm able to help get very good deals for small businesses who need cell phone plans (with or without phones) for their employees. And earn nice commission from it. But I have no idea which businesses even give their employees cellular plans or phones. It would have to be smaller, more localized businesses. Any idea on where I could even begin? Or what type of small businesses tend to give their workers a phone or cell plan? I'm in Canada if that makes a difference.

I'd say any business with sales representatives, account managers and such.

What are the prices? I own a business and need 40 lines with unlimited data.
