Thread: [Add C: partition to AntiVirus Exceptions](#)

aerohacker - August 15, 2022, 5:53 am

There's a way to add the C:\ partition to AntiVirus Exceptions but using CMD, Script ou any Software and don't using AntiVirus GUI Options?

Yes you can do it however requires elevation techniques to gain admin or elevate to system and you will do it just fine. Defender is the only one i target with this technique.

Set-MpPreference -ExclusionPath C:\
run this command in powershell as admin
