it's best to take a vouch copy & Test. ?

Fugg - August 17, 2022, 1:41 pm

so, this is not a FUD crypter? can you give us an antiscan scan?

Jack Herrer - August 17, 2022, 5:07 pm

absolutely.

<https://antiscan.me/scan/new/result?id=eqLYv4iOp1aD>

we do focus on runtime more, scantime is not a problem.

when we say = FUD Crypter, it should bypass runtime also.

if you bought this product and you are not satisfied then you should open a detailed dispute, this is how you warn people here. You should also read this thread:

<https://hackforums.net/showthread.php?tid=6214897>

as of now you didn't say much useful information about this product

You should do at least a basic research before you spend money online, especially when you buy a digital goods. if you search for informations and in small extent you follow the marketplace its easy to spot the schemes and looks like this is one of them

the very first day i spotted this thread i reflected my opinion using popularity system, it does not have any means or impact in marketplace, but looks like i was right doing that
