Thread: [Looking for a team to launch crypto tokens](#)

Ghostwork - August 17, 2022, 1:14 pm

Hi there lads, hows it going?

Well straight to the point, I'm looking for a team to launch tokens with. If your involved in the 'shitcoin' or as some like to call 'memecoins' scene, then you'll know that there are projects every other day, some lasting long, others lasting less than a day.

I'm looking to get together a team who are preferably experienced, but don't have to be to launch tokens on a day-to-day basis (every 2 to 3 days)

Anyone that knows about this will know how extremely profitable this is as we will always be the ones to buy in first and then pump the project.

There are various roles to play, so looking moderators for the Telegram chat all round the globe etc, graphic designers etc. If your interested do drop me a DM and we could talk some more!

How much do you invest into something like this?

007 - August 17, 2022, 1:22 pm

Wrong section pal.

However I can develop alt coins, feel free to PM me your discord.

I can't PM yet but I can do graphic design, moderation, promoting on twitter with pictures (im a girl so it'll help)

send me your contact details or post it here I'm not sure if I can even read PMs or how it works.
