Thread: [GET DIRECT DOWNLOAD LINK FOR YOUR EXE , BAT FILE | SITE FOR UPLOADING MALWARE](#)

M Rex - August 17, 2022, 11:22 pm

I Built Up a small Malware Hosting Site For Just Fun And Thought To Share it With You Guys :)
You, Will, Get Direct Download Link To each file you Upload.

\$ Get a Direct Link To Each Item You Upload

\$.exe .bat .vbs extensions Allowed

\$ Files up Upto 15MB Allowed

Link: DIRECT-TROJAN [dot]GQ

A13x - August 18, 2022, 5:08 am

How do we know you won't swap/bind your payload to ours? NOOB SCAMMER

OP, thanks for the Link but i tested this and my server name was yloo dot exe but after the upload the result says <https://direct-trojan.gq/file/EMGQS> DOT exe.

Can you kindly explain why it change my output to EMGQS?

With that name i decided not to open it yet!

I just want to be sure of what i do.

Because the Php Script uses md5 to generate random name to prevent file override.

Ex: - someone upload server.exe to the host & after sometimes another person uploads a file with exact same name. Then it causes to file override

I hope you can understand :)

And the domain itself is no good for practical use lol.

Bruh, As I said, I just built This for fun. And I Don't need to spend money on a thing that returns nothing. That's Why it's free.gq domain

By the way you're speaking sounds like you're an idiot hosting it at home lol which in turn will get too much attention to your own home network. But good luck i guess

Lame attempt to hijack potential installs.

qops - *August 18, 2022, 7:33 pm*

hmm... doesn't seem like something people should be downloading ;)
