Thread: [LIFETIME SUBSCRIPTION EM INDICATOR](#)

Kvothe - August 19, 2022, 1:55 pm

Hi guys,

As you can see I sold my LIFETIME SUBSCRIPTION to EM INDICATOR owned by TIMO.

Why am I selling it?

Because I dont have time to be checking TradingView and my daily life will not allow me to do it in a future. I bought it because I thought It was a call service I can follow blindly.

You will get access to:

- Futures indicator
- Spot indicator
- Futures pre-alerts
- Access to a private discord channel
- Excellent support
- Great community.

If you're just starting off and you have the time and most importantly DEDICATION to check trading view and make trades throughout the day then, this is for you.

The indicator is great, the team is awesome and they will add FOREX INDICATOR in a future. I dont have any bad word to them but as I told you, the indicator is not for me.

PRICE

Normal price is 1000€, if you wanna know my price DM me.

As Im totally new posting in the forum but Im a old user, I will accept MM.

Hi guys, still available...

Timo - August 25, 2022, 1:29 am

Normally we don't allow this, but see this as a 1 time exception (other people please don't PM me asking the same)

Side note tho, ATM the price for lifetime is 600 euro, not 1k (<https://em-algo.io>)

You need to reconsider your pricing. Why would anyone pay €1K for a €600 product officially offered by owner?

The fact that you hide the price you sell it for means you are not much lower than the official price.

Just post what you sell it for here or just close your thead
