Thread: [Lets fun with scanned docs](#)

I have a lot of information about one person and I want to make its life very colorful and bright! If you have any ideas of how can we use scans and other info, pm me:) I will take just 20% of profit when you are taking 80%. If you aren't interested in money, then offer something else, let's have some fun guys? Waiting for your offers!

I understand you're talking about document scans? For me, such an action is completely pointless and the benefit of it is not adequate to the effort that must be put into it. If I were you, I wouldn't bother using that data. But if you care so much to hurt this person and you don't just care about profit, then put that data somewhere. The Internet will do its job?

And doing what you're doing now is very illegal and will only make it worse.

what kind of information ? if it is blackmail for no reason you need to rethink your priorities. unless they did something really bad, then stop.

Gotta love the help me posts on a daily basis but I suppose they do provide new people to the scene.
