Let's make this short, I'm starting an onlyfans agency

I know how to run the business, recruit tons of models running ig ads and meet them irl, but I don't have the capital to buy a big following ig page and run ads. So if you got money and you're willing to print cash managing tons of onlyfans models hmu on here or on My Telegram is gottlinfinity

You don't need a big following ig page. The agency has to have less followers than the model. 2.5-3k will do which will cost you roughly \$35
