What sorts you apart from other available eft cheats? You seem to have barely any features besides esp. Is there any built in HWID Spoofer?

Its just an ESP. Aimbot is under work and will be added later on when I am happy with the humanizing. So currentlty only ESP is in stable state.

I dont offer any "rage" features in any of my cheats (Apex/R6S/EFT) as I want to provide for legit/closet minded people my products. So if thats more of what you are looking for I dont offer that

HWID spoofer I dont provide and have no plans to, simply too busy maintaining multiple cheats at the moment

If you have any more questions let me know.

I am not too familiar with EFT cheats, or cheats in general for that matter. However, I did a quick search around and \$50 a month for only ESP seems kind of steep? Is there any reason for this price? What makes this stand out from the others?

you're probs lookin at scams bud, other forums for legit cheats (just ESP) even runs ya about 20\$ just for 3 days for mediocre ones, 60\$ for decent kernel ones

5-10\$ per day is about the average imo so this is a decent price

I personally feel that the price is fair for low userbase cheat. I had a poll regarding fair price for it in our community and this is where the middleground was so I will stick with it
