Thread: [Any Good Platforms To Do IG Automation On?](#)

Blockonome - August 22, 2022, 5:46 am

Hey everyone,

Anyone know a solid platform to do "like & Follow" on for IG? Must be able to like and follow and unfollow, without any risk of getting a suspended account, as best as possible.

I used to use it back in the day, but IG made it very difficult to do botting, is this still the case or is there something out there, that works?

It can be free or paid, that is all good.

I low key need this too. Sorry for grave digging but I figured it would save me the hassle of making a new thread.

All bots have the risk of banning your account, but personally mine has a pretty good no-ban ratio. Just be careful on the actions you perform and don't completely abuse a bunch of features on an account you care about.
