Are you asking because of fear of getting your cashapp blocked or?

I mean if ur only worry if the irs and ur ain't using cashapp money to pay for important bills or things that are registered under ur name, then you might as well find a different way like a cashapp that is not linked under ur name and spend that cash that way u ain't getting fxcked by the irs no matter what u spend.

Stop using any of your personal accounts to receive money from ew right now , just my opinion, it's up to you ?

Stop using it as soon as possible, unless you plan on paying taxes on that income.
