Thread: [Cheap gas method | SAVE BIG MONEY | Easy to use | Still working after 6+ months |](#)

Autophobia - August 28, 2022, 8:16 am

Title says it all this method is not complicated its extremely easy to use and in most cases this method will essentially pay for itself in its first or second use.

I want to make this very clear i am selling a method i have been personally using for the last 6+ months to save me money this method is extremely simple i would not be shocked if there are other methods like it, i did a little research and did not find any method like it on here and similar forums but that does not mean this method is not anywhere else so please only purchase this if you wish to save alot of money on gas. (This is not a method to get free / penny on the dollar gas) This method will save you anywhere on average from 10-50 dollars depending on how much gas you get.

Price: \$20

Payment method: Cashapp btc eth venmo amazon gift cards and paypal for trusted users.

Save \$10-\$50.. is there an estimate on how much per gallon you save on average? And is tye savings affected by price? Like if price goes down so savings go down as well?

its a little over a dollar a gallon savings.

Hollow™ - August 28, 2022, 2:51 pm

Is it every time you pump or just 1-2 times use only? What gas stations are involved?

You can use this to allow you to get these discounts every time you pump. Its not limited a small handful of gas stations brands. Pretty much all the major brand gas stations.

I was fortunate to receive a vouch copy of this method and I'd like to take a moment to thank OP for selecting me to review this method.

This method is straight to the point nothing confusing, no funny business. Setup was easy and it take about 30 minutes to get everything going.

After setting everything up you should see your savings instantly.

This is definitely using the upside app. The app isn't a secret. But like every upside life hack everyone post most are just for a few cents off and can only be used one time. I'm simply showing people how to save \$1+ every time and be used unlimited times. No need to sales bash. Like my thread stated there's no huge secret behind this. Just maximizing savings used a method I've saved myself hundreds of dollars in the last 6months. There's plenty of people who have zero idea what the upside app is let alone how to save \$1+ A gallon every time they fill up.

Let's also not forget 80% of this forums paid \$100+ to get a promo code for \$20 worth of Uber eats not to long ago. Doesn't matter how silly or known something is if you don't know it and there's value in knowing it there's people who would pay a small fee to get in on the savings.

I am interested if this will not require signing up more than one time or referring people. Currently on my app I see 58 cents per gallon up to 82 cents per gallon savings (with no promos).

Happy to use a middleman.

Dog. - August 28, 2022, 8:27 pm

Ooo cool. I hit a gas station 2-3 times a month so this would be really nice. Do you need to do the method again every time you go out for gas?

If you're getting upto 82 cents in your location then maybe this method isn't for you? Your savings are location based now granted I haven't seen anyone get 82 cents off a gallon without doing anything but that doesn't mean you're not. This method would learn more towards someone like me who only gets 10-20 cents off at most in their area and that's with the new account promo they give out for their first fillup. This method simply allows you to maximize savings for \$1 off a gallon and teaching you how to cash out every fillup since upside isn't going to allow you to cash out on the same payment info over and over (to my knowledge) at a extra 18 cents a gallon saving it'll take you much longer to see a return on your investment of the method but if you're still interested feel free to start a contract but like I said if you're seeing 82 off without doing anything this more likely isn't for you.

Yes you'd have to preform this method each fillup but I show you how to preform this method in very little time. It's very easy as long as you follow the steps in order and read over the notes you'll have no issues preforming this method

No referrals are needed. Yes a new account is needed every time but the method is very simple and quick so this is not a inconvenience

I received a vouch copy from the OP a couple days ago regarding this gas method. I was pretty excited to try this out as I drive pretty frequently and fill up constantly. OP sent out the text file explaining in great detail how it works from A through Z. This method is somewhat public but the additional tweaks he adds to it make it more worth wild.

It's beginner friendly and anyone with a smart phone can have this setup within 10-15 minutes at the most. On your first fill up you're almost making your initial investment.

Check the image below to see proof.

The method the op delivered is one of the simplest method I've seen here. He fully outlines what you need to do and answers any questions I gave him. After filling my main driver and spare car I easily made the initial investment back. I would definitely recommend looking into this method and following the advice of the op if you regularly fill your car.

(Sep 7, 2022 05:19 PM)Fellow Man Wrote: [\[CITE\]](#) Which gas stations does this work at?

It's not limited to specific brands of stations. I'd say most stations can use this method. There's no way of me knowing specifically what stations in your area will work but for reference there is typically always 1 station within a mile or two from wherever I am needing gas. Unless you live in the absolute middle of nowhere you should have no issue finding a station to use it at.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
