Thread: [Which crypto wallet send Instant Payment to bank without trading ?](#)

503501 - September 1, 2022, 7:39 am

I need to know , Is there any Crypto wallet where I don't need to find any buyer to buy my coins and then he send the funds to me in my bank. if you guys know about any other wallet , from where crypto can be sold direct and payment withdrawn to bank instant (24 hour) is ok .

Any suggestion friend ?

Which coins do you have in mind, or are you asking more generally?

Binance offers a direct swap where you can swap most if not all holdings to your favourite currency and then you can withdraw that to your bank immediately, but most exchanges will allow a sale of a stablecoin (or any major asset) for your desired currency which you can again immediately withdraw. I'm not sure what it is you're trying to avoid really in the process, as technically converting any asset to fiat to withdraw is still a trade.

If you're in the EU (or can find a way) you could try Nuri.

They offer a personal IBAN which is directly connected to an exchange = You sell crypto, you get €.

They were former known as BitWala.

I believe this is what you're after, OP.

<https://zondaglobal.com/en/pay>

I believe Stripe offers something similar too.

There's many other services that offer this, but I can't think of any more off the top of my head.

You can exchange it for BTC on paxful and a few other sites

adamhk - September 22, 2023, 6:00 am

Several exchangers have a converter which allow you to convert your BTC and several other crypto in another crypto or even with fiat in real time, binance and coinex for example

I think I would use binance if I do not want to go through a P2P marketplace.
