Thread: [DeepFake Android App #DeepFake #Mobile #App](#)

Venom_CB - September 2, 2022, 12:53 pm

DeepFake App is modified by H4RV3ST3R CB and does not require any expertise to create a legitimate video. However, this means that anyone can make deep fakes to advance their goals. For instance, DeepFake Apk can be used to disseminate false information about the presidential candidate. However, Microsoft is working on AI-based Deepfake Detection software to accomplish this. The tool will automatically analyze images and videos to satisfy the need for trust, which the media have compromised.

DeepFake Apk features:

- Make DeepFake photo
- Create a deep fake camera
- Switch your face to a different face
- Automatic face recognition, and tracking
- Face swapping
- Facing blending
