Thread: [\[NEW\] Buster - Crypto-currency typo prevention tool](#)

Edge of Nowhere - September 2, 2022, 4:02 pm

ABOUT

Buster is a crypto-currency typo prevention tool that checks your clipboard for any typos you may have and corrects them so you never send to the wrong address ever again.

PREVIEW

FEATURES

- Seamlessly scans your clipboard for crypto-currency addresses and replaces them with pre-set addresses.
- No dependencies required (Native executable).

SUPPORTED CRYPTO-CURRENCIES

- Bitcoin (BTC).
- Dogecoin (DOGE).
- Ethereum (ETH).
- Litecoin (LTC).
- Monero (XMR).
- Ripple (XRP).

PRICE

- 10\$ per build.
- 40\$ for 5 builds (20% OFF).
- 70\$ for 10 builds (30% OFF).
- 100\$ for the source code (Delphi).

ACCEPTED PAYMENT METHODS

- Bitcoin (BTC).
- Dogecoin (DOGE).
- Ethereum (ETH).
- Litecoin (LTC).
- Monero (XMR).
- Ripple (XRP).
- Mostly any crypto-currency upon request.

3/3 VOUCH COPIES AVAILABLE.

(Sep 2, 2022 04:13 PM)INCR?Đ!βLE Wrote: [\[CITE\]](#) Doesn't look authentic. I'd totally stay away from such programs which read my clipboard. especially crypto-currency addresses. god knows if it somehow replaces the address. I'm fucked.I have plans to add a GUI to it, just didn't

think it was really necessary.

(Sep 2, 2022 04:29 PM)zeit Wrote: [\[CITE\]](#) haha but it isnt a cliper a.....Anything can be put to different uses if you put enough time into it. Example, Teamviewer was modified for unintended uses. So it's really a matter of perception. Another example, most RATs aren't use for personal use, which they should be, again, perception.

P.S. For future posters, if you're not interested, don't post.
