Thread: [Whatever happened to Snowden?](#)

NARVI - September 3, 2022, 7:32 pm

Anyone of you happen to know what happened to Edward Snowden after his whistle blowing? Heard he's still employed but this time not by NSA but a private company. He must be getting paid pretty well by now. Did he really sold and earned those leaks?

You can find him on Twitter. Looks like he's a journalist.

working for the other side more likely, he has vast knowledge on certain secret tactics, so most likely a special contractor to some special foreign power.
