Thread: [CHEAP SHELL GAS 20 GALLONS COME GET IT! UP TO 50% OFF](#)

Bruce Banner - September 4, 2022, 11:40 pm

Keeping this short and sweet, I'm selling 20 gallons of cheap gas from SHELL gas stations. Purchasing from me can save you up to 50% off at the pump.

This works for any shell gas station anywhere in the US.

Regular, premium, diesel all available. If Shell has it, we got you covered. No cracked accounts, nothing illegal, no use of apps/websites, no botting involved.

NOTE This is for 20 gallons of gas at a time so if you fill up and only use 10 gallons you can't claim the other 10 at a different time. You'll need to use it all at once.

NOTE Once you purchase, you will have 24 hrs to get the gas. Please only purchase when you are ready to fill up. No refunds will be given.

To get started I will need to know the current price of gas at your nearest shell station and the type of gas you are getting. Simply send me a PM with this info and we can get started with a contract.

1 vouch copy of extremely cheap gas is available for a highly trusted member. Post or DM if you think you qualify.

Accepting crypto for payment, will take zelle for more trusted members.

Now to make it worth it a suv or can that can hold 20 gallons will be the best choice to bring to the shell station. What I did was that I brought my 12 gal Jeep and filled it up, then brought my dads car and added the remaining 8 gals.

That's what I would do tbh. All I paid at the pump was .38 cents. THATS IT. I'll definitely be bringing my service to Bruce. Thank you for the vouch copy.

Xtaci - September 5, 2022, 9:29 am

Yes, you will pay me a set price and you will have 20 gals available. So if your vehicle doesnt need 20 gals I suggest bringing a friend with their car or a container where you can store the excess gas in. You also dont have to use the 20 you can just fill up whatever you need and leave.

Would be around \$50 for 20 gallons. Unfortunately can't split it up maybe bring a friend and do 10/10?

So what isn't posted here which should be after inquiring with the seller.

The "DISCOUNT" is based on how much you pay per gal.

Example: I told him gas near me was \$3.80 a gal.

He replied it's \$45 for the discount if it's at the \$3.80 gal, the math breaks down to this being the cost of around 13-14 gals of gas, you get 6-7 free.

This isn't very discounted gas, I'm not sure where he's getting 50% savings from, but once you do the math it doesn't add up. Maybe someone who fills 20 Gal's of gas maybe like Premium could see some value to this, I just don't see it at all.

Either way good luck with sales.

\$45 would get you 12 gallons so in this case you are getting 8 for free. It's literally 40% off how can you not see that as a discount? If your car doesn't hold 20 gallons you can bring a friend with another car or a container to hold it. In your situation you would be getting 20 gallons of gas for \$45 when you would normally be paying \$76. How can you say that isn't a discount?

This actually worked out great, the price was substantially better than original gas prices.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
