Thread: [Looking for workers 4.000-15.000\\$ Per Month Crypto Exchange](#)

CryptoBulled - September 5, 2022, 5:51 am

Welcome to the Crypto Bulls team!

On average, our employees earn from 4 to 15k \$\$\$ per month. You will learn this with our detailed guides, nothing complicated.

We offer our project and support for cooperation.

If you are looking for an up-to-date and constantly improving project with stable work and payments
- Welcome to our team!

Thanks to many years of experience in such projects and the presence of our programmers in the team, we can offer the services and functionality necessary for comfortable work.

Support 24/7. Support and website.

Education. Access to exclusive materials where the profit is from \$5k per month.

High-quality functionality of the platform.

Automatic payment system.

High percent.

Anonymity.

Your main task is to attract as many people as possible to the site. Learn it with our detailed guides, nothing complicated.

Your payout will start with 60% from your the deposited users. So, for example, any user from you deposits \$10,000 -> your \$6,000.

Why 60%?

Since you do not need to process a person on the site, a professional team of social engineering specialists will do it for you—a team of professionals capable of getting from 1 person from \$ 1500.

According to simple mathematics, I suggest bringing one person every two days who deposits \$1000. Then your earnings for two days will be \$600.

1. We give complete freedom in choosing a strategy. If you are a beginner, we will provide guides and examples of how you can work with our site.
2. Added the ability to check deposits without the help of an admin (at your discretion)
4. Added the ability to add fake deposits and withdrawals from the site for workers for proof (ask admins)
3. Made a fake output for the workers
4. If you make 10k\$+ per month, then the next month, you have payments of 70%
5. Added a referral system on the site. You see all your victims who registered with your referral + their deposits.
6. Added several guides for working with victims
7. Added the ability to connect a personal domain (all deposits from a private domain are paid to you personally without additional proof). Also, on a personal domain, you can change the minimum deposit, requested deposit, withdrawal error, site rules, and % staking through the admin. (connection of a personal domain costs \$20, we advise you to buy a private domain after one or more profits on the leading site)
8. Added email confirmation mail (so far, it works in test mode)

I see it as Ponzi schemes or defrauding in a professional way. Please prove me wrong.

So the job is to get people to go to this website, where their team will try to scam them into depositing crypto that they will never get back.

Do not join if you don't want to help scammers.
