Thread: [Buy \\$150 BTC No KYC & 0% Fees](#)

**Nice** - September 5, 2022, 10:29 am

Keeping it short and sweet.. there's a site that not many people know of that you can buy \$150 BTC with NO KYC and 0% fees.

They accept Apple Pay/Google Pay or Visa/Mastercard Debit card. You can go search google, I haven't found it anywhere.

All you need to sign up is an email and phone number (for no KYC purchases).

I personally have been using this site for years to sell BTC on Paxful, you can repeat is as many times as you want.

You just need to have a bunch of emails and phone numbers, proton mail works fine & I'll provide a site upon purchase for numbers.

I'm selling this site for \$100 and there will be no limit of copies. We can use MM until first successful purchase (reputable members).

This site accepts these currencies for card purchases: USD/EUR/GBP/TRY/AUD/CAD

Unlike other sites, this one DOES NOT ask for Selfie with card or any extra BS verification.

For people questioning it, this is NOT:

Moonpay

Simplex

Switchere

or any well known website!

PM me if you have any questions or want my contact info.

1 Vouch copy available for a highly reputable member.

BTC/ETH/LTC accepted.

[contract=tid]Start Contract[/contract]

ex. I buy \$150 BTC 5 times to make \$750No, you will just need to use multiple numbers/emails.  
Preferably with residential proxies as well.  
It's \$150 per account then after that they ask for KYC. I'm able to do it as many times as I want to.  
I've used the same card via Apple Pay/Google Pay on multiple accounts, no issues.

**Seiyoku** - September 5, 2022, 11:10 am

I would like to know if the vouch copy could be available for me.

"I personally have been using this site for years to sell BTC on Paxful, you can repeat is as many times as you want"

what does this mean? You cannot sell BTC on Paxful directly thats why you need to use your site or something?

something involved blackhat? carding to get BTC and sell it via your site?

**Benjam1** - September 6, 2022, 2:36 am

Hey, my question is simple: what are the fees if I decide to buy crypto with the same account? (I can verify the KYC without issue)

Thank you

How much profit do you make per \$150 you sell on Paxful? Also, what are you selling your BTC for in Paxful?

I get BTC from this site and sell it on paxful for profit.. nothing blackahat is involved, because I can get BTC for 0% fees I can sell for 10-20% on paxful and make a profit.

(Sep 6, 2022 02:36 AM)Benjam1 Wrote: [\[CITE\]](#) Hey, my question is simple: what are the fees if I decide to buy crypto with the same account? (I can verify the KYC without issue)

Thank you  
First purchase is 0%  
After that it's 3-5% but you'll need KYC.  
KYC you can buy \$10k a day / \$25k a week  
I always create new accounts just so I can keep the 0% fees for maximum profit.

**Zimhoni** - September 6, 2022, 9:45 am

Sent you a pm regarding the vouch copy, waiting for a reply :)

**Nice** - September 6, 2022, 10:06 am

Closing this, site is patched.
