Thread: [\[SELL\] MY AUTOSHOP OF EMAIL LIST | +200M IN STOCK | AUTO-DELIVERY | DEBOUNCED](#)

**opsec667** - September 7, 2022, 1:48 pm

Hello,

I am selling my project who is called "mail-list.cc" where you can buy 200M+ leads with automatic delivery.

The autoshop has been designed to run autonomously without the need for any action from the admin or to restock his mails.

We have set up a system that allows you to restock mails simply by moving a text file containing your mails to the server and the system will automatically process the mails and register them in the database in a few seconds.

The same for the delivery of the customers it is automatic thanks to scripts in BASH & Python as well as an autodestruction of the links of downloading programmed on 72 hours.

There is also a script that runs every 15 minutes to check the current stock of the shop.

Screens server stock -

Our script can deliver more than 2.500.000 mails in less than 30 seconds at the customer's request. Restocking of mails takes about less than 30 seconds as well.
