Is this Jamber, or just someone selling their invites?

I can't vouch for cubex specifically, but I can for AB. I'm familiar with the owner, and he's a good dude- knows his shit. I doubt this will ever get beamed.

And this is a good price, considering he never really sells invites- or even talks about it publicly.
glws homie

Ephexia - September 18, 2022, 7:43 pm

That would be interesting

Well he does allow us to sell the invites, and indeed the product is very good, I was surprised as well, after trying other providers I can say AB is the best so far. And thank you ?

What other features are included? Just esp and aimbot? What's difference between aimboss and for instance, lastcheat

Aimboss is for legit play, lastcheat is mostly used for rage and has a lot of risky features, also it gets DT every week or every 3 days.

Aimboss has: Aimbot, ESP, Glow, Flickbot [very strong], triggerbot, loot esp and glow, bunnyhops etc. And it has been UD since season 7

EDIT: OUT OF STOCK. I WILL UPDATE THREAD WHEN I HAVE SOME.
