Don't Leech

Like & RepToday I would like to introduce you to a website that I have personally used for learning. On this website you will find almost every book and e-book on every topic. It is perfect for learning coding or just for school or where every you need books for.

The number of available books is few and only the old ones are available. Maybe it will be easier for you to get the kind of information you are looking for on this site.

I can't share link so delete the * symbols

I've found this before. But no time for reading I like to watch the videos. Is there a similar site with videos?
