Thread: [PRIVATEHUB SMS GATEWAY | TURN ON YOUR ANDROID TO SPAM BULK CUSTOM WEB PANEL](#)

opsec667 - September 13, 2022, 8:31 am

PRIVATEHUB SMS GATEWAY ?

Send bulk SMS and MMS using your Android device SIM. ?

We offer WEB Panel where you can send single SMS / bulk SMS to your victims.

You need to add manually your devices by downloading .apk, then you will scan QR CODE to connect your device to your account.

We got FastFlux server, ip update every hours and service always online to avoid suspension.

Features

- Send bulk MMS : It supports sending MMS too. You can send normal text messages as MMS or you can also attach image files with your messages. It also provides an API, so you can send MMS messages programmatically. This feature relies on MMS availability in your country and support from your network operator. The receiver must be capable of receiving MMS to receive it. If you can send MMS normally, then it should work. This feature should not be confused with RCS or any other messaging capabilities provided by the device manufacturer (e.g. Samsung message, Mi message etc.)
- API : Send SMS from your application developed using any programming language.
- Tracks message status : Shows status of messages sent using SMS Gateway in Panel.
- Auto responder : You can add responses for certain messages so whenever you receive that message app will reply it automatically.
- Use multiple devices to send faster : Ability to sign in using multiple Android devices to split messages between them when sending bulk messages.
- Supports Dual SIM devices : Send messages using any SIM programmatically or using Excel file.
- Rotation on bulk SMS between SIM / devices.

Prices

Day access (demo), max 1 device connected, 14.99\$

Monthly access, max 20 devices connected, 129.99\$

Lifetime access, max 50 devices connected, 889.99\$
