Thread: [HOW TO GET \\$100 AGC FOR \\$50 AND \\$200 AGC FOR \\$100 \[WORKING FOR AMAZON.COM ONLY\]](#)

Kaoru Hanayama - September 13, 2022, 3:04 pm

Greetings dear forum members !

I'm here to present you a very unique method that I've been using which made me over \$10 000 in Amazon Gift Cards so far.

You need to have crypto in order to buy the gift cards.

For \$50, you're getting \$100 worth of gift cards and for \$100 you are getting \$200 worth of gift cards.

This method works only with Amazon.com Cards

The method is very simple to use and can be done by anybody. There is daily \$1200 gift cards limit. The method works only with \$50 and \$100 denominations.

The gift cards are 100% clean and you can use them in your account or resell them somewhere.

The price for the method is \$5000.

You can purchase by sending me a private message or adding me in Discord Kaoru Hanayama#7192

Some of the gift cards obtained with the method:

These cards are 100% legit and won't get cancelled. The \$1500 is a discounted vouch copy price. I see selling methods with MM as a waste of time. If you're interested we can work on some sort of a deal, message me on Discord as I'm more active there.

You're making it back in 2 days, so it's pretty cheap if you ask me. Also as I stated this is a dicounted vouch copy, I will increase the price to \$3-4k

Sakhill - September 13, 2022, 4:43 pm

Well I don't want go into private as most of people will have same questions, things are simple you won't get money until I make money. So that's why I was go with MM, other possible option is that you get paid in full when I make 80% of invested money back (2 days as you said).

If those options doesn't suits you I'll pass on this.
Cheers

OP is selling a Method
People want to buy only using Middleman
Op first refused
People called Scam
Op raised the price of initial offering and said he would use Middleman
People are now saying the price is too high.....

I don't understand how people have this mentality as if there is no risk involved in these methods. If people were selling you a method where middleman holds funds until you make money to pay them, everyone would be rich. So many idiots.

What a nice selling thread we got here.

First OP refuses to use MM even to reputed members then eventually "accept" it by raising the price for more than 250% for this sole reason without forgetting to mention the 5% fees for the MM. He even make sure to repeat the price to make sure that we understand that it's better to not go with MM. Hoow kind!

It just misses the [limited copies] to turn all the lights in red.

So basically I'm paying over 5k\$ for mysterybox of the person who have shady history here on HF (go through his profile)

I can pay 5k\$ but MM will be zexi or any staff member who will accept 5% fee (probably all of them as this is 250\$ of EZ money)

But what I will not accept is that money is released after first trade as this could be manipulated, what I mean by that is that OP could buy 1.2k\$ worth of giftcards and send me that through site where I suppose to work.

So contract should be simple, money can be released once when I return over 80% of invested money.

If the method is legit I don't see how that can be a problem.

So hopefully now you understand all those "idiots" who actually use their brains.

Absolutely agree with you, but I'm buying it as I have spare cash and willing to learn something new, it's same with this one... but as it's impossible to make deal with OP which will be good for me and for him I will have to pass on this one.

Mostly you get basic information but if you use brain you can make cash, just from the last one which I buy I made over 4k\$ atm. so yeah, you can always get new info which can lead to make plenty of cash, but 99% as you said methods are public and shite but sometimes you can get something good :)

I can record video of the pics to prove that they are not edited. Also you could check every single code and try to redeem it on Amazon to see it's already been redeemed. There is a reason why I made the codes visible, so people could try redeem them.
