Thread: [How to get someones email address](#)

crocZ - September 16, 2022, 2:13 pm

How could I find someones email address? Given I know their socials, phone number, and can do some social engineering. LMK

Mr. Robot - September 17, 2022, 3:03 am

Pretty easily.

If facebook use their facebook URL as that's their 'username'

https://www.facebook.com/login/identify/?ctx=recover&ars=facebook_login&from_login_screen=0

If twitter/insta same thing

Search name on skype - if it comes up with a username like live:username then you can assume their email is username@gmail.com or some email domain.

Searching in databases like

<https://leak-lookup.com/search>

That's just a start, but honestly would take you less than 5 minutes to pull their emails.
