Thread: [Why I think ETH price could surpass BTC price \(if bullrun before CBDC'S\)](#)

xPlutus - September 18, 2022, 2:02 pm

I wouldn't be surprised if the Ethereum price passes the Bitcoin price (should there be another bull cycle)

Ethereum meets the ideal picture for a cleaner environment in the eyes of globalists, Bitcoin in contrast is extremely environmentally polluted according to their agenda. Since the price is set by globalists (in dollars) they will probably explode Ethereum hard if only to change people's mindset about POS coins.

There is already legislation being built in Europe banning POW coins there is not much mining in Europe but it is also mainly a psychological attack on real crypto, most people don't even know why crypto exists so you can fool them into believing anything

Ethereum has just become centralized junk but because it is in the hands of globalists they are not afraid of it and can decide to just push it to extreme heights. (This is if another bull cycle arrives before CBDCs make their appearance)

What do you think?

Upgrader - September 18, 2022, 2:05 pm

Do you mean surpassing market cap or actual price a coin?

xPlutus - September 18, 2022, 2:54 pm

Actual price

Upgrader - September 18, 2022, 2:57 pm

(Sep 18, 2022 02:54 PM)Dark Prince. Wrote: [\[CITE\]](#) Actual price

That would make Ethereum worth \$2.4 trillion, to put this into comparison the ENTIRE crypto market is less than 1 trillion including ETH's market cap. 2.4x the entire market in one coin. Not happening

G Eazy - September 18, 2022, 3:01 pm

I don't ever see this happening. I see ETH going back down to \$900 before anything happens anyway. But ETH will NEVER pass BTC.

Parisian - September 18, 2022, 3:32 pm

In actual price? never. In market cap? Maybe someday in a distant future..

cobravon - September 18, 2022, 5:20 pm

Price not a chance. I doubt market cap either.

Do You Want To Bet - September 18, 2022, 5:21 pm

yea what every one is saying price per coin never

Motusora - September 18, 2022, 5:50 pm

eth has unlimited supply , so i'm not sure if it will surpass btc .

popZmoke - September 18, 2022, 7:01 pm

I was like aye lets see and I scroll down and see this

(Sep 18, 2022 02:54 PM)Dark Prince. Wrote: [\[CITE\]](#) Actual price
I dont think that u realise what it takes from ETH to pass BTC in price.

AnonymousRAT - September 18, 2022, 8:17 pm

Never gonna happen but lets hope

jomaray - September 19, 2022, 10:22 pm

It's not healthy to get drunk so early

Pablo? - September 20, 2022, 8:07 am

i dont think i know but it wont last for long maybe few weeks or months i got visions

Omniscient - September 20, 2022, 8:33 am

Quote:Ethereum meets the ideal picture for a cleaner environment in the eyes of globalists

Nonsense. There are also better PoS chains with Smart Contracts and other features that surpass Ethereum. Plus, fuck the Globalists.

Quote:Bitcoin in contrast is extremely environmentally polluted according to their agenda

Saying someone is true doesn't really make it true.

Quote:There is already legislation being built in Europe banning POW coins there is not much mining in Europe but it is also mainly a psychological attack on real crypto, most people don't even know why crypto exists so you can fool them into believing anything

Half of EU is cunts. Fuck'em.

I think Ethereum is gonna crash under \$1k and go basically nowhere. This will be a sign from the crypto community that we don't give a fuck.

ETH ain't ever passing BTC. Just accept it as a fact.

PR1V473 - September 20, 2022, 12:09 pm

Sometimes people deserve the Dunce Award more than they deserve the fresh air they breathe. Insults put aside, ETH will not reach BTC's mcap, let alone the price per coin. All of gold and silver in the world would need to be sold and bought into ETH for it to achieve that.

BITCOIN is the king, other altcoins they come and they go. The real question is, could Ethereum keep it's #2 throne in the next bull cycle? Would it be hack-proof, or will it suffer a devastating breach and everyone would lose the little trust they have in the chain?
