i paid the user \$25 for a design similar to this one, he provided me with absolute trash at first, just a black poster with a stock image and my text, i then told him that quality is bad and he said he will fix it, he added some lousy images and it still looks horrible. I hate to leave a bad review and i usually don't but i specifically provided him with examples beforehand and he said he can do it, his graphic in this thread is much nice than what he sent me. He decided to ghost me on discord because he knows he did a bad job. i also paid him extra for fast delivery and he didn't meet that requirement either, i advise to stay away from doing business with this user
