Thread: [I need 10,000 for new teeth, but I'm broke, so I have to become a hacker. Advice?](#)

The Honeypot - September 19, 2022, 8:56 am

My teeth are rotten, I am not your usual human, I am a natural born hacker, and have stayed in my room on my computer from morning till night, and forgot to brush my teeth like every day. So yeah I'm 26 and looking forward to getting white teeth. It's horrible having these teeth, and it's probably one of the main things making me feel so shit/negative, it's a horrible feeling in my mouth, and my tongue won't leave one of my left teeth alone, it just does it. But yeah. It's a nasty situation but I'm hoping to make £10k (that's cheap) for whole jaw dental implants.

Any advice? I have a good setup, FUD shit that bypasses no problem, but I just don't know where to spread shit.

I'm planning on contributing here and posting my progress. Soon I will post a YouTube video of my Rating Virtual Machine.

I will give an overview of my setup, and show people the simple steps you can use to bypass WD, and make it possible to spread.

But I lack creativity/imagination/encouragement, and I think it's down to my teeth, so hopefully when I hack my way to white teeth I will feel better about life. But please, if you have any advice for a determined hacker, let me know!

Get them done in Turkey, it will only cost you around £5.5k.

I know exactly how you're feeling though bud. - Good luck on your journey!

Yeah I just can't really travel right now I don't think but yeah I would get it done in Turkey, but I've looked on this website; <https://www.hertsdental.co.uk/full-jaw-implants/> costs £10k, and I've just seen you can pay monthly, though my credit rating is bad I'm not sure that's how it works, but I may be able to get them very soon. Which is very good news for me. Hopefully I can make this happen.
