{ LIMITED EDITION OFFER }

So do you want to start a web-casino ?

If so i would recommend you to read thread and choose the best option for you.

Beginner level, Get a E-Book.

1. Learn how to manage web-panels.
2. Learn how to monetize users database to maximum level.
3. Understand basics of how crypto payment system works.
4. Understand why choosing right server for your casino is so important.
5. Learn how to manage, setup and change source code settings depending on your needs.
6. Find a ways to get traffic into your casino.

After you have learned all above listed things you can go to next level which are getting source code.

A lot of people think that managing casino is easy part and money just flows, sad true is that its very hard job to properly manage a good casino.

Advanced level, Get a Source Code.

So as u now understand how to setup and change settings for your needs u can purchase a Source Code.

But before getting Source Code u need to fill these requirements.

1. Get a Dedicated Server.
`minimum: 8GB RAM, 250GB SSD, 500MB PORT SPEED.
2. Get a Domain Name.
`recommend to include word "casino"
3. Get a VPS Server.
`to handle all crypto payment traffic.
4. And final requirement is to get a Source Code.

U would ask so what do your source code includes ?

1. Easy understandable code.
`noob friendly with //notes what every function does.
2. Easy costumizable web-design.
3. Fast and secure connection between VPS and Dedicated.
4. Automatic plugins update system.
