I need good Residential ipv4 proxies, was using webshare/packetstream but they are flagged now. Any recommendations?

The most cheapest one and high quality in same time is Liber8Proxy

Their Prices also start from only \$3 a month (unlimited)

the other current websites like brightdata, sox, oxylabs, etc prices start from 600 dollars a month and limited traffic

not only that but they also ask you share your gov ID on camera

and if you said no, they say no refund!!

Brightdata, sox, oxylabs, scammed me and still unable to refund.

While Liber8Proxy.com doesn't even ask about your real name and they sell only residential and mobile proxies and they are all virgin proxies

what that link means?

the post even deleted!!!

a guy asking scam??

can't i go reddit now and type: hackforums.net scam??

and then post get deleted from there, or i delete it when i know i was wrong?

this is really funny!!

when you accuse someone something you should show at least one proof

or i can go reddit now and say google.com scam ??

Whatever, i believe the news and my experimient than a "DELETED" post on reddit you don't even know what he means the one who typed it!!

Oxylabs and Smartproxy are two good providers.
