Thread: [HELP - "Please insert CD Rom" ISO file booting](#)

Blockonome - September 21, 2022, 9:07 am

Hi guys,

I want to play a game called Bubble Bobble Hero 2 - Found a legitimate website online where to download, however, when I run the application .exe file, it says "Please insert Bobo2 CD ROM".

Now I found a guide online saying that I could use IMGBurn in order to convert the folder into an iso file, but when I open that file, it literally just opens IMGburn with no way of actually booting it up.

Could anyone help me with how I might be able to run the .ISO file correctly?

Hello,

Are you on Windows 7 / 10 / 11 ?

When you click on it twice, does it mount in the explorer (in "My computer") ?
