Thread: [BECOME A HACKFORUMS ENTREPRENEUR | CUSTOM READY-TO-SELL PROGRAMS | MAKE REAL \\$\\$\\$](#)

Doomslayer - September 21, 2022, 9:25 am

BECOME A HACKFORUMS ENTREPRENEUR WITH NO PROGRAMMING EXPERIENCE

Have you got a great business idea for a program to sell on here? I am an experienced developer who can make your idea a reality. For a one time development cost, I will write a fully working, ready-to-sell program for you.

Hackforums has a HUGE userbase. With a good idea and good sales skills, you can EASILY make your money back.

After my work is done, I WILL NOT ASK YOU FOR A DIME. YOU TAKE 100% OF YOUR PROFITS. This will be YOUR program. It will not be sold by me to anyone else.

I will happily give advice on marketing and sales if requested, but in the end this is YOUR business.

What To ExpectYou will get the full source code.

Fully written from scratch. No stolen or outdated code.

You will a full run down on how the program works, how to distribute, etc.

Licensing, anti-crack, payment processing, and everything else needed for a commercial program.

All bug fixes are 100% free.

Updates with additional features can be done for an additional cost.

My qualificationsI am proficient in full stack web development, desktop application programming, blockchain/crypto/NFT programming, network/sockets, and system programming.

I can write in Java, Python, C/C++/C#, Solidity, Javascript, Rust, and more.

I have 100% satisfaction here on Hackforums, with vouches on my other programming service threads.

PaymentCrypto is preferred.

Since this service offers an incredible amount of work, there will be no vouch copies.

I do require an upfront payment before starting work. The percentage can vary depending on your reputation here.

Every program will be different and therefore I cannot provide a blanket price, but the minimum will be ~500-1k.

I determine my price by how much time the project will take. Once we agree on a price, I will not change it or ask for more UNLESS you request more features that were not originally agreed upon.

I am happy to discuss off site, but an on site contract is required to start work.

Please message me here or on telegram to discuss your project. Do NOT message me with only "hey", "you there?", "I need something coded". In your first message, send me the details of what you need, and any other relevant information. I am not trying to be mean, but I spend way more time than necessary answering hi's and hey's.

[contract=tid]Start Contract[/contract]

Have some coding things that I need done in the Web3 space, do you have any experience with that?

Edit: Nvm saw you do, will be reaching out here shortly

SIM-587985 - September 21, 2022, 3:06 pm

This looks awesome, let me shoot you a message.

Just want to clarify for future readers, I have experience with both web3 applications and on chain smart contracts.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
