Thread: [\[Valorant \] Anyone got sauce on how to mass produce accounts?](#)

Lives - September 21, 2022, 3:20 pm

Hey HackForums,

I've been looking to get some insight on how people mass produce Ranked Ready Valorant accounts.

I've been in the market of selling ranked accounts (buying ranked ready accounts, ranking them up to higher elo) for a while now.

I'm wanting to further expand, and potentially eliminate spending money to purchase these ranked ready accounts and simply do it myself.

I'm wanting to do this not only to maximize profits, but to also eliminate any sort of risk factor that comes with purchasing these accounts from somebody else, and holding me accountable for the safety of the accounts..

If anybody could provide me any sort of information, I would greatly appreciate it.

& to anybody who says to hand level the accounts, I've hand leveled numerous ones already, and it's not worth the time. I'd rather mass produce these accounts, so I can sell faster and have a more reliable way to push these out.

Thanks!

When I was buying Ranked Ready accounts they all didn't meet the level requirements but could play because they were old accounts. It seems cracking old unverified accounts is the way most people get them tbh.
