Thread: [Scammed \\$125 - L3NG_MAN](#)

Byrnzie - August 19, 2010, 11:50 am

Sup,
Me and Eb0y designed and coded a template for VirtualVZ.
We agreed on \$125 for the template and we finished it and sent him and he paid for the template i notice in my Paypal he opened a dispute he got the \$125 back and still is using the template.

If you look at the style.css it has HycoDesigns in what Ck1.3 has seen with his own eyes.
HycoDesigns is owned by me and eb0y, it is our design portfolio. Proof we own hycodesigns - <http://hycodesigns.com/verify/>

He said he designed this template and coded it when he did not so its going up for sale at £5.00 (Unlimited copies)
If we do not get \$125 back into paypal WE will be selling this.

Your choice you pay and it will stay unique or we sell it simple as

Don't trust this guy complete scammer.

Byrnzie, Eb0y.

That thread has nothing to do with this, ive been waiting to refund him but he's been away and i havent managed to catch him online.

Regarding this template that is complete lies. Ive never done any business with this guy on HF and i never even knew he was a member of this forum. I am not a scammer, you can ask any of my customers.

Regards.

on hf or not you're a scammer, like being a scammer out of HF is something good ? and scamming HF members is bad whether they're on HF or not, and using things you scammed to sell them on HF is even worth.

Ive never done business with you on HF, i did business with a guy named kyle on another forum. I can't believe this... That is the VPS i gave you for the WEBSITE design, you AGREED to refund the \$125 and now you have changed your mind? The only reason your doing this is because i shutdown your VPS after you started to try and extract money from me after you wen't against your own agreement.

Ok.... Well you admit to scamming this user. You didnt scam him on hf because you didnt know he was an hf user. Hes putting the message out there that you are a scammer other places.

I am Kyle? You did business with me on Webhosting Talk.

<http://www.webhostingtalk.com/showthread.php?t=970139>

There is the actual thread, you offered \$250 and a VPS. I did the job for half price and took the VPS. you then said you didn't need the design no more and was getting a new one, he got the money back, i requested for the design to be taken down, he blocked me on MSN and has blocked me on his websites live support, proof: <http://uploadir.com/u/a1a069c6>

Stop lieing and refund my money or take down the template, simples.

Nope, you agree'd to let me keep the Website design providing i let you keep THE VPS i gave you (because you said you wanted to start a webhosting business). Now you have changed your mind about and have broken your own agreement you made with me.

Byrnzie - August 19, 2010, 12:36 pm

I said I wanted the design taken down and you said okay it will be done in a few ours, I then asked for the effort can i keep the VPS you agreed but later on in the day the VPS was can celled.

He is now trying to make out I'm the scammer

I canceled your VPS after you started calling me a scammer. The AGREEMENT was you would let me keep the DESIGN providing i let you keep the VPS.

Byrnzie - August 19, 2010, 12:39 pm

Post the chatlogs please, you are completely bullshiting as you said i could have the VPS for the effort.

1) i never scammed anyone.

2) i blocked you because your a moron.

Things Hycodesigns has done:

Lied about saying only 1 person coded the template

Harassed me for several days, and made several threats against us

Broken your own agreements you made with us

Blackmailed me for giving you more money

trashed another person's reputation

XiX Eb0y XiX - August 19, 2010, 1:17 pm

Kyle did all of the coding tbh i did a few parts of it and yes we trashed yours got a problem and i dont know who else iv trashed but kk

No i don't have a problem, because all of my clients can vouch im not what you say i am. And if i manage to get the msn logs your going to look like complete frauds.

JamesBuckley - August 19, 2010, 1:21 pm

I Only created An account to say this i trust HydroDesigns more than L3NG, Becuase i know EbOy, and he is very trustworthy, and the fact that they have proof of them designing is just one thing, but having proof if it being design by them on your site is Another thing
