Thread: [Alternative to Snapchat Ewhoring](#)

nakama30 - September 24, 2022, 4:45 pm

in current events to snapchat and its war against premium snapchat and adult promotion, they made it a very hostile environment for growing an adult account.

my main traffic is shout outs and i see clearly the effect on this war..even real established models that i used to do shout outs with, with aged accounts are losing their accounts left and right to the point where i have no1 to do shout outs with lol.

even im super careful to what i post on my story, no mention of selling or any type of promotion instead i talk to people manually on the chat..no nudity or revealing content..just the type of storys models upload on other social network like instagram and tiktok ect and that still gets your account banned.

all it takes is one angry troll to report your story once and twice, that should get your account deleted with a device ban.

im sure this issue applies to other sort of traffic and your accounts are at the mercy of trolls.

have you guys moved to other platforms, if not how are you dealing with this issue ?

Move to Twitter and Reddit, they both allow adult content.

Obviously the best choice would be Onlyfans, but only if you have a real girl who's working for you or who you partnered up with.

twitter seems good but its not nearly as interactive as snapchat, the later being actually a messaging app
