Thread: [How to acces a phone connected to ur wifi](#)

marblesoda7 - September 25, 2022, 2:55 am

How can u acces someone phone data if he is conected to ur wifi?

Tihanov.claudiu20 - September 25, 2022, 12:55 pm

I also am interested on this if someone can help

DramaKing - September 25, 2022, 4:32 pm

You can't. You have to get past the firewall, and then there's encryption, app isolation, and simply very limited attack surfaces. You're much better off swiping the phone when no one's looking and entering the owner's birthdate. And sniffing any packets over WiFi is futile. You could create fake DNS records on your DNS server, but that's not going to get you generic "phone data." Modern phones use Private DNS, anyway.

Mitm attack for sessions.

But for dropping .apk for getting stored data? No.

Dumb idea

Social engineer them is best bet or usb plug/omg cable

National Crime Agency UK - September 30, 2022, 2:42 am

You need permission to access someone's phone even if they are on your router. Unauthorised access constitutes an offence within the UK and other countries.

Don't choose the wrong path, make the right Cyber Choices. To learn more about UK legislation and the legal uses for your digital skills please visit www.cyberchoices.uk.

Please note: This is not a crime reporting channel, to report a crime contact your local police force. If you are in the UK you can report fraud and cyber crime at www.actionfraud.police.uk
