Thread: [40.1K FASHION LUXURY DATABASE](#)

**MeyerWolfsheim** - October 2, 2022, 2:55 am

Dear users,

I'm here to offer you a database of 40.1K+ contacts of a well-known Italian high fashion e-commerce. The database was not hacked but simply downloaded from the corporate mailchimp by a friend who worked there until two months ago and managed the marketing division.

The brands covered by the platform range from Gucci, Saint Laurent, Bottega Veneta to lower-end brands such as Pinko, Ralph Lauren etc. in total they currently have more than 1200 brands.

All customer emails have been put together over six years of online activity. The emails are from customers who are all extremely fashion-oriented, especially on luxury brands. The proprietary database platform has an average shopping cart of 400€, in short, we are talking about customers with a very high usual expense.

If you are looking for an incredibly valuable database to create campaigns related to the fashion industry, you are in the right place.

The database is divided into four email blocks:

- 1187 cleaned contacts
- 3340 unsubscribed contacts
- 16844 subscribed contacts
- 18761 nonsubscribed contacts (these emails were collected through social contests, virtual chats and other plugins on the platform)

The emails come from international clients all over the world, with a majority of American and Italian contacts. This database will be sold to up to 10 customers. Considering the high average spending rate by these people, you can use the database for commercial purposes or for hacking.

Escrow or Middle Man, of course, is accepted.

Price is: 2000€

For a fastest contact find me on Telegram: <https://t.me/mwfactory>

Alternatively you can send me a message here on the forum.

Feel free to write me for any additional information or doubts.

**Beaks** - October 3, 2022, 1:55 pm

I received a vouch copy of 6000 lines in email:name format.

I looked into a few of these contacts and of the sample I selected and they seem to be from users that would buy luxury fashion products or be associated with a luxury brand.

**MeyerWolfsheim** - October 3, 2022, 2:06 pm

Thanks for checking that everything is ok! Enjoy your vouch!?

**INCREDIBLE** - October 24, 2022, 5:31 pm

Trust me. you might not get any seller here considering your account is non-upgraded and the amount is quite big. but well, good luck with sales.

**MeyerWolfsheim** - October 25, 2022, 1:21 am

I accept the possibility that there is a Middle Man to verify the authenticity of the service. :)

Just to let you know, that works out at 5c per lead, Which is fine but highly expensive even if you was selling to one person who might want leads which are specifically for that industry, However selling a database 10 times for the same price isn't going to get you anywhere. Believe me. You can find databases similar to this with millions of records for an absolute fraction of the price.

**MeyerWolfsheim** - October 25, 2022, 1:53 am

Do you think this is the place to give this kind of opinion? You are the number one. I just don't believe that millions of emails of this quality are being sold at a fraction of the price, perhaps emails from Indians, Pakistanis or bots with an average cart of 50 cents, that for sure.

Thank you for your interest but the database has already been sold to three people in a month through Telegram and Middle Man.

Best regards!

**MeyerWolfsheim** - October 25, 2022, 2:04 am

(Oct 25, 2022 01:59 AM)Exploit\_R4v3n Wrote: [\[CITE\]](#) Interested in a vouch copy if available DM me for 1K free records. So we can check all together the truthfulness of the database ;)

**MeyerWolfsheim** - October 25, 2022, 3:00 am

I am willing to send the same sample of 1K records for free to another user for a double review. Write to me as soon as possible :)

Hey !

If you want I can make you a vouch and write a review.

Anyway, I wish you good luck with your future sales!

**MeyerWolfsheim** - October 25, 2022, 5:01 am

No more vouch currently available, thank you. For anything else you can write me.

**Chez\_Yuki** - October 25, 2022, 8:20 am

After receiving the sample of 1000 lines and so I come to give my opinion.

The file contains 1000 email addresses. Each email address has some additional data like the preferred brand, the country of origin or the gender. The logs vary between 2018 and 2022.

It is clearly possible to do something with this list, whether it is SE, phishing or simply advertising campaigns by email.

It's not for everyone, but if you're interested, it'll be useful for sure!

Anyway, thanks for the vouch and GLWS !
