Thread: [\[Life coach/ Licensed MD Dr.\] Listen to you and be your life coach and motivator.](#)

murt - October 2, 2022, 6:02 am

Let this thread be something new other than 'how to make 99999\$ millions per day' type of threads.

We all experience times in our lives when we feel isolated, depressed, and unable to move forward.

Since we face a variety of challenges that cannot always be resolved by ourselves, we occasionally lean to someone to talk to and seek advice from, which is why I'm here.

I'm a licensed dr, but more than that, I've been in your shoes—stressed, apprehensive, and unsure of what to do with my life—and all that I want to do is support you while you go through similar experiences.

I have a strong desire to support people in overcoming their worries and accepting themselves for who they are.

What I offer:

- 1- i will listen to you.
- 2- share potential solutions to overcome these matters, only if you allow me to.
- 3- available 18 hours a day.

Expertise:

- 1- I myself is a licensed Medical doctor in turkey, Germany and USA.
- 2- My wife is a clinical psychologist, we can always get more information from here, should the necessity rise.
- 3- I am a long term crypto and stocks trader and expire to psychological beariness there is inevitable.

Price:

- 1- 5\$ for 60 minutes
 - 2- 10\$ for 60 minutes at your OWN chosen time. Could be immediate.
 - 3- 50\$ for 30 minutes everyday for a whole month or until you get back on your feets, (whichever comes first)
 - 4- 60\$ for full medical check up (psychological and physical by video. (I have hospital hands on experince for telemedicine).
- [contract=tid]Start Contract[/contract]

Interesting thread, but much like the fitness trainer who opened a sales thread here offering personal training services, it may not be the most appropriate place to get clients.

But still, I can see people benefiting from this.

Any where we can verify your credentials as a medical doctor?

This isn't to profit or side hustle. This is to bring the aspirations of people here on hack forums back to live. Markets stocks real life issues relationships are very underlooked. People trying to make money like no tomorrow. This could help them stay on the grind.

I can show my diploma
