Thread: [website template for phishing HELP](#)

warreng - October 2, 2022, 1:20 pm

lets say my "friends" is a scammer who does cvv, log, carding etc. he want to try a new methodes do anybody know how to recreate a interac transfer website for phishing? it would say something like "deposit your money 250\$ from ..." then "select your financial institution" like the real thing except when the person would choose is bank and enter is info theyre would be a keylogger who tell me his info.
