Thread: [Quick Love button doesn't work If you donate to the OP of a thread](#)

flavoral - October 2, 2022, 4:23 pm

Was just testing this with [mention=1306528] (he didn't have a choice).

I noticed that if you donate any amount of bytes to the OP of a thread, then try to QL the thread, it will give a false positive error saying that "You have already Quick Loved this thread"

You can try it yourself on this thread.

EDIT: Actually, issue is on any post, not just the OP.

?nxy - October 2, 2022, 4:39 pm

test out the quick love on me for sure

Ty actually, just edited the thread confirming that the issue applies to any post, not just the OP.

Tested on Zeus, can confirm the bug, i can't quick love him on this post after i've given him bytes through the button in postbit.

Cuz you did it the other way around.
You should've donated by first then click on QL to replicate the bug.

Ah my bad flavi :3

Blazin - October 2, 2022, 8:37 pm

Interesting, not the worst bug in the world though.

Omniscient - October 3, 2022, 9:36 am

Thanks for reporting. I work on fixing it.

EDIT: Fixed. Thanks.

Was a weird situation if you donated from the the post and then also QL'd that post. Code was set to just look for any donation but now it's specifically looks for the QL action.

Nice. Just tested it again, and it's indeed fixed.

While you're still on the roll of fixing small bugs, maybe you can also check this old report which idk if it was fixed or not: <https://hackforums.net/showthread.php?tid=6150354>

EDIT: Also fixed, thanks.
